

Tried and proven Duratuf

Kiwi Garden Sheds are the number one storage solution.

Here's why:

1 Robust timber frame

Duratuf Kiwi Garden Sheds have a machine finished treated timber frame for added strength and rigidity. This includes a *H4 ground treated base plate*. Timber plates are rebated to form a strong corner joint and colour coded for clear part identification. The timber frame also provides easy fixing for tool racks, shelves and work benches etc.

2 Durable steel cladding

Duratuf Kiwi Garden Sheds are manufactured from strong, high tensile *.40 gauge steel* roll-formed into an attractive six rib profile. This cladding comes with a 10 year warranty and is available in zinc aluminium or a range of colour coated options. *Every colour shed comes with its own touch-up paint and brush.*

3 Easy-build kitset system

Duratuf Kiwi Garden Sheds are a pleasure to put together with clear step by step instructions to guide you through the easy installation process. Timber parts are colour coded for your convenience and doors are pre-assembled ensuring hassle-free installation. *All fixings are provided.*

4 Strong sliding door

Duratuf Kiwi Garden Sheds feature a durable easy-glide door system. Not only does this save valuable space, but it eliminates the hassle of doors swinging in the wind. Each pre-assembled door includes two 30mm rollers, which roll in a purpose-formed track. The door guide is specially designed to avoid trapping dirt and stones. Doors come with a full size handle, hasp and staple and rubber stoppers. *Duratuf Kiwi Garden Sheds even include a padlock.*

5 High wind tolerance

Duratuf Kiwi Garden Sheds are the preferred option in high wind areas. The strength of the steel combined with the sturdy timber frame creates a robust structure that withstands strong winds when anchored securely.

6 Spouting

Duratuf Kiwi Garden Sheds have a *spouting front and back*. This channels the water away from the door area and ensures no run off back into the shed.
