

How to order your Aluminium Fencing

Step 1: Choose your Fence Panel*

Choose your fence panel from one of the five options below. The standard panel size is 2.5 metres long and 1.2 metres high.

*Customised panel styles can be manufactured. Please check with your local fabricator or Fabtech for details.

Step 2: Choose your Fence Caps**

You have the option of two spears, an aluminium cap or an economic plastic cap for the top of the verticals on your fence panels. Aluminium Spears and caps can be powder coated to match the colour of your fence panel. Note: The plastic capping comes standard in black and cannot be powder coated.

J Female (FCJF)

C Female (FCCF)

Aluminium Cap (FCAC)

Plastic Cap (FCPC)

**Additional non stocked fence caps are available. Please check with your local fabricator or Fabtech for details.

Step 3: Post Options***

Aluminium Fence Posts are constructed using a 50mm x 50mm box section. Posts are available in two sizes, either 1.2 metres for surface mounting, or 1.8 metres for in ground fixing.

When there is a gate section in your fence a single oversize post may be required (*refer to the Gates Section back page, Step 3: Select your Post Options*).

In ground Post. 50mm x 500mm box section.
1.8 metres high (FP1800)

Surface Mounting Post. 50mm x 50mm box section.
1.2 metres high (FP1200)

***For customised post requirements, please check with your local fabricator or Fabtech to discuss your needs.

Step 4: Select your Post Bases****

For all surface mounting applications a post base with four fixing holes is available; this is ideal when attaching your posts onto areas such as decking, courtyards or retaining walls. A single hole base is also available for use with the in-ground posts, this base is fixed onto the post and then concreted into the ground to add extra strength, however this is not a necessity.

Four Hole Base (FPB4)

Single Hole Base (FPB1)

****Additional bases are available for different applications such as wall, or sideways mounting. Please check with your local fabricator or Fabtech for details.
